SHARPLINE

FINEST QUALITY HAIRDRESSING SCISSORS from Seki JAPAN

www.sharpline.co info@sharpline.co

ABOUT US

Established in 1989, Sharpline has become the leader in new technology and innovation in the hairdressing scissor industry. Over the years Sharpline has grown from a small family business to an internationally renowned hairdressing scissor design company based in Tokyo utilising the world's most advanced hairdressing scissor factory and advanced technologies from Seki in Gifu. Through a long commitment to research and development, Sharpline specialises in the highest quality precision computer guided technologies, advanced alloys, material and advanced hardening processes, all unique to Sharpline products.

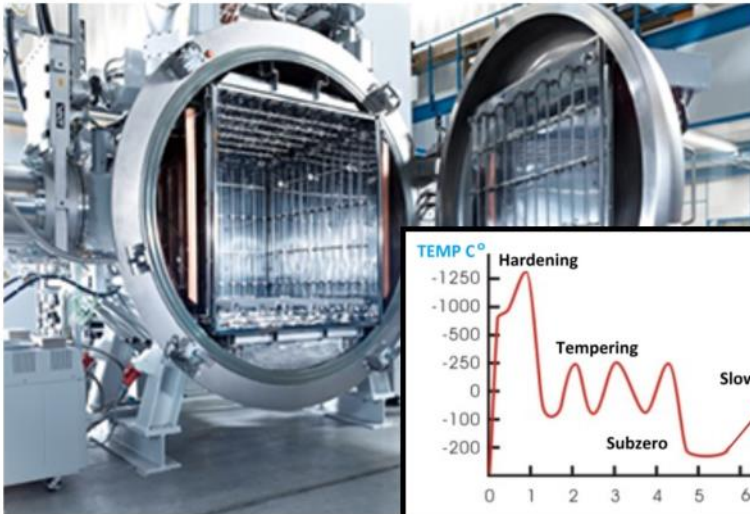

Technology and Design

Precision machining technologies surpass hand work in preparation and grinding of the hairdressing scissor. Hand grinding can not achieve ultra fine tolerances that only 3D CNC Diamond machining can. All Sharpline's Japanese made models start on the computer drawing board, with CAD CAM designs Sharpline can utilise new materials and alloys not possible to hand grind. The Sharpline manufacturing method allows sculptural and ergonomic individually custom fitted designs, the first in the world. Our factory is situated in Seki Gifu, famous for over 600 years as the centre of Japanese sword and cutlery manufacturing.

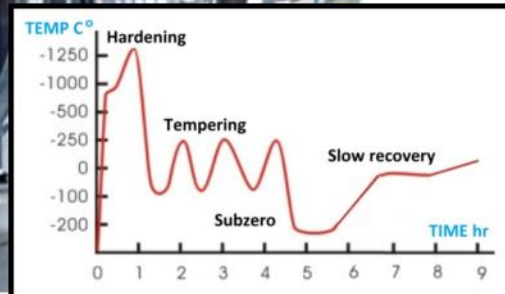

Worldwide Patents

Sharpline and its manufacturing partners own more than 100 International Patents and Patent Pending. The main patented features unique to our manufacturing is the MicroSlit™ Laser sharpening system, the Multishear™ interchangeable blade system, the Combthru™ machined and polished thinning scissor tooth system along with many blade design features and blade alloys such as TVM Nanocarbide™ alloy and Hybolt 19™ CBA alloy. At Sharpline we never stop with research and development, always searching for the next great innovation to further improve our amazing hairdressing scissor range.

Advanced Hardening

The Ceramic Seamless Vacuum furnace with Nitrogen injection is the world's most precise hardening and tempering technology, far superior to cheap, quick, oil quench hardening which can cause distortion and cracking.

The highest quality alloys can take 9 hours to complete the hardening cycle. Our scissors emerge in perfect condition without twisting, distortion, variation or carbon migration. This process maximises secondary carbides which adds edge strength and wear resistance while reducing brittleness and optimising hardness.

CYBORG Custom fitted

with MicroSlit™

CYBORG 2.0
¥ 220,000

CYBORG 3.0
¥ 230,000

CYBORG 4.0
¥ 245,000

Custom fitted models
are made to your exact
finger measurements

Cyborg Custom fit models are available in handle sizes Small, Medium, Large, and Extra Large as well as made to order custom fitted. Blade sizes 5", 5.5", 5.8", 6.3" and 6.8" Ultra Cobalt. Left handed available to order

FUSHU
¥ 125,000

CLASSIC
¥ 125,000

Detail of machined and polished
tooth stems of the Combthru™
patented design

Premium Combthru™ thinning scissors come in 25 tooth, 27 tooth offset and 30 tooth models. This unique patented technology allows the uncut hair to flow smoothly from the thinning scissor without damage to the cuticle. Speedcut is designed for texture cutting and razoring on either dry or wet hair.

MULTITHINNER™

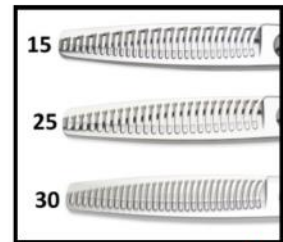

CONDOR
¥ 100,000

EAGLE
¥ 100,000

HAWK
¥ 100,000

MultiThinners are available
in standard and reverse
configuration

Multishear™ high polish handles . Thinning 6" 30 tooth, 25 tooth and chunky 15 tooth. " J " tooth designs for a smooth blended cut. UFO type tension adjuster sits flat, click plate type

SL Thinners

BRONZE SERIES

6T Texture Slide
¥ 50,000

10T Chunky
¥ 50,000

27T Radial
¥ 50,000

SL 27T Radial thinner has the unique "J" tooth design which enables variation of how much hair they take out. Tooth blade on front removes 20%, tooth blade on back removes 35%

SL Pro Stylist Thinners are designed to work either together "doubled up" or individually. 6T and 10T tooth are designed to give a textured cut and removed about 40%. Be careful with new thinners to check the adjust often during the running in period, do not pressure cut the edges as they will damage easily

First Star

GREEN SERIES

Cutting
¥ 32,000

30 tooth Thinner
¥ 32,000

Business Opportunity

Sharpline is looking for talented business partners worldwide. We count amongst our happy customers many of the highest level cutting educators and companies.

Are you looking for independence and a flexible lifestyle?

Perfect applicants would have cutting talent and speak with confidence combined with sales ability. Multimedia and social media abilities would also be an advantage. Sharpline believes in educating our customers on the healthiest and most suitable hairdressing scissor choices for their own particular cutting techniques. Our sales approach is through education, demonstrations and supervised trials.

Since 1989 Sharpline has been dedicated to innovation, technology and advancing design. We are constantly moving forward and leading the way. For more details email info@sharpline.co

Warranty and conditions

Lifetime guarantee - Sharpline uses high quality parts and all our scissors are guaranteed free of faulty workmanship for life. Sharpline guarantees to replace all worn parts free of charge for life during normal servicing. Sharpline guarantees a minimum of 5 factory quality services available for all our scissors (some of our scissors can be serviced up to twenty times under the right conditions) All Sharpline distributors have access to Sharpline Authorised factory quality servicing, please contact your local distributor for details or email us at info@sharpline.co

Conditions - Guarantees for Sharpline brand scissors are subject to servicing by Sharpline Authorised service agents only. Any Sharpline scissor serviced by an unauthorised company is immediately void of all warranty or guarantees. Scissors that have been poorly maintained, miss-used or over worn before servicing may also void their guarantees.
